

Better Together: Fusion & Maximo

Modern enterprise asset management requires more than powerful software—it demands an intelligent, resilient platform underneath it. IBM Maximo and IBM Fusion together provide a complete solution that simplifies deployment, strengthens security, improves resilience, and accelerates modernization across hybrid cloud environments.

DEPLOY FASTER. OPERATE SMARTER. PROTECT EVERYTHING.

Together they create an integrated platform designed to deploy, protect, scale, and modernize mission-critical operations. Deploy IBM Maximo in days—not months—with integrated infrastructure, automation templates, and pre-validated architecture.

Why Combine IBM Maximo with IBM Fusion?

Together they create an integrated platform designed to deploy, protect, scale, and modernize mission-critical operations.

IBM MAXIMO

Manage the Mission

- AI-driven Enterprise Asset Management
- Predictive Maintenance
- Asset Lifecycle Management
- Inspection & Work Management
- IoT & Analytics

IBM FUSION

Power the Platform

- Application Data Platform for OpenShift
- Enterprise Storage
- Backup & Disaster Recovery
- Hybrid Cloud Management
- Infrastructure Automation

Accelerate Deployment

Deploy IBM Maximo in days—not months—with integrated infrastructure, automation templates, and pre-validated architecture.

Integrated storage. Automated management. Simplified operations.

Automated protection. Continuous availability. Enterprise resilience.

Hybrid Cloud Strategy with IBM Fusion Control Tower

Infrastructure Designed for Maximo: Rather than assembling storage, networking, compute, backup, and disaster recovery separately, IBM Fusion delivers a pre-integrated platform optimized for Maximo deployments.

Business Challenge

Asset performance & reliability
Modernize Infrastructure
Reduce Operational Complexity
Protect Critical Systems
Scale Across Hybrid Cloud
Peace of mind

Maximo + Fusion Solution

AI-powered predictive maintenance
Intelligent orchestration, hybrid cloud readiness
Pre-integrated deployment
Automated backup & disaster recovery
Fusion Control Tower orchestration
Multi-site resilience & enterprise security

Fusion HCI

Systems management innovation accelerates cloud-operating model and scaling productivity versus Roll-your-own (RYO)

Fusion HCI Management Software & Engineering

Reduce total cost & project risk

Accelerate cloud-operating model

- AI-ready platform integrated with Red Hat OpenShift
- Simplified monitoring and system visibility
- Coordinated infrastructure lifecycle management

Scale-out and scale-up easily

- Proven HA/DR and backup automation
- Automated compute, storage, and network provisioning
- Scale infrastructure quickly with minimal complexity
